

Test Drive SAP Before You Commit

Experience SAP S/4HANA and embedded AI in a real business context to accelerate your ERP decision with confidence.

The Challenge

Evaluating ERP solutions is complex, time-consuming, and risky. Traditional demos rarely reflect real operations, stakeholders struggle to align, and decisions are often made based on assumptions rather than experience.

Customer Challenge

How ERPsim Helps

Demos feel disconnected from reality

Experience SAP in realistic, end-to-end business scenarios driven by your own decisions

Stakeholders struggle to align

Create a shared, hands-on experience that builds consensus

Unclear business case

See how SAP supports your processes and outcomes in practice

Resistance to change

Engage users early to reduce friction and improve adoption

Difficult to validate SAP fit

Test capabilities in a risk-free environment

The Result

Gain a clear understanding of SAP capabilities and embedded AI, align your stakeholders, and reduce implementation risk, before you sign anything.

What is ERPsim

ERPsim is an immersive business simulation running on a live SAP S/4HANA.

Participants operate a simulated company, making real-time decisions across finance, supply chain, sales, and operations. Each action directly impacts business performance, allowing teams to immediately see how SAP supports end-to-end processes and data-driven decision-making.

Real Business Scenarios

Distribution

Logistics

Manufacturing

Sustainability

Public Sector

EAM

Defense & Security

And more to come.

Who It's For

- SAP prospects in evaluation
- Business and IT decision-makers
- Process owners and functional leaders
- Project teams and key users

How It Works

- Live, interactive simulation
- Make decisions in real-time
- See the impact instantly
- Compete, collaborate, and align

Try ERPsim Capabilities

Hands-on interaction with SAP S/4HANA

Role-based, real-world decision making

Real-time operational data, analytics and performance insights

Interaction with **AI Agents** providing analysis and decision support

End-to-end visibility across business processes

SAP **intuitive interfaces** to explore how SAP looks, feels and connects
